

Vegas-Style Indiana Live! Casino Selects Surveillance Solution From Synectics

“We have been very pleased with how user-friendly and reliable the Synectics’ system is and have found this system to be easy to maintain”

Lois Coyle-Duffy

Director of Surveillance Indiana Live! Casino

June 2008

Synectic Systems, Inc. (Synectics), global provider of enterprise-class digital video recording, and award-winning command and control software products, has been selected by Indiana Live! Casino in Shelbyville, Indiana to create a custom surveillance solution for its temporary and brand new 233,000 square-foot facility opening in January 2009 adjacent to Indiana Downs racetrack.

The new facility will not only feature slots and electronic gaming devices, but also upscale dining and nightlife

destinations, and a 5,000-seat outdoor concert venue. The closest casino to Indianapolis, Indiana Live! opened its 70,000 square-foot temporary location in June 2008. This facility features more than 1,900 slot machines that are monitored by over 300 cameras with Synectics’ digital recording system and Synergy™, its industry-leading integration, command and control software. Once the new facility is opened in 2009, there will be approximately 500 channels of high quality digital recording monitoring the casino.

Digital video integration to a Pelco matrix switch, point of sale and access control systems will provide sophisticated monitoring and data analysis capabilities within Synergy. The new system will enable Indiana Live! surveillance operators to access live and recorded H.264 digital video instantaneously with multiple layers of system fail over and 24/7 reliability. With its comprehensive, scalable and centralized security management system, Synectics has earned gaming industry recognition for surveillance solutions that meet and exceed the demands of the tightly regulated casino environment.

(continued on other side)

Lois Coyle-Duffy, Director of Surveillance at Indiana Live! Casino states, "Having a somewhat unique situation at Indiana Live! Casino, we installed a 480 channel Synectics system with a Pelco Matrix in our temporary facility and recently placed an order to expand that system to at least 640 channels for the permanent facility which will be opening in 2009. We will also be taking our

point of sale integration from 12 stations to 48 stations and have an integration scheduled with a DSX alarm / access control system. We have been very pleased with how user-friendly and reliable the Synectics' system is and have found this system to be easy to maintain. Synectics was one of three systems considered and we are pleased that it was the system selected."

Synectics designs integrated end-to-end surveillance control systems for the world's most demanding security environments. We excel at complex projects that require innovative tailored solutions with high reliability and flexibility, specifically for casinos, oil and gas, marine, public space, banking, transport and critical infrastructure applications.

With over 25 years of high security systems experience, field proven products, and expert support personnel in the UK, US, Europe, UAE and Singapore, Synectics offers its clients turnkey networked solutions for comprehensive protection and peace of mind.

Synectics is part of Synectics plc, a global leader in advanced surveillance, security and integration technologies and services.
