

Synectics Implements PSIA IP Media Device Specification to Synergy™

"Synectics decision to implement the PSIA specification demonstrates the company's commitment to the development of open standards for IP-enabled security technologies."

David Bunzel
Executive Director, PSIA

CARPINTERIA, CA – December 7, 2009 – Synectic Systems, Inc. (Synectics), a leading supplier of integrated surveillance and security systems for specialized vertical markets, today announced that it has implemented the Physical Security Interoperability Alliance's 1.0 IP Media Device specification into its Synergy™ video management system and the Synectics digital recording system. PSIA is a global consortium of nearly 50 physical security manufacturers and integrators that are focused on promoting interoperability of IP-enabled security devices across every segment of the security industry. More than 850 industry leaders have registered for access to the 1.0 API Media Device since its initial release.

"We are proud to be among the first major surveillance technology companies to incorporate PSIA IP camera specifications into our award-winning Synergy™ video integration management software," said John Katnic, Vice President and Chief Operating Officer of Synectics. "Synergy's advanced PSIA-compliant capabilities were successfully confirmed at PSIA's interoperability demonstration during ASIS 2009. Synectics has designed integrated 'hardware agnostic' security systems for 25 years and is committed to implementing recognized industry standards that give our customers the true benefits of 'free choice.'"

About Synectic Systems, Inc.

Synectic Systems, Inc. (Synectics), a wholly owned subsidiary of UK-based Quadnetics Group Plc, is an engineering, integration and manufacturing company with expertise in IT and networked systems, CCTV control systems, enterprise DVR and command control software applications. Quadnetics is listed on the Alternative Investment Market (AIM) of the London Stock Exchange.

Synectics' unparalleled ability to deploy custom digital surveillance solutions that integrate with existing legacy systems and future technologies has established them as a market leader in the Middle East, the UK, Europe and North America.

The PSIA specification enables Synectics solutions to directly and immediately connect with third-party manufacturers' IP devices. By leveraging the strength of the PSIA open interface, new devices can simply be connected and Synectics' recording solutions can perform a search and automatically integrate that device.

"Synectics decision to implement the PSIA specification demonstrates the company's commitment to the development of open standards for IP-enabled security technologies," said David Bunzel, Executive Director, PSIA. "The company's strong support of PSIA also illustrates that our reach in international markets continues to grow."

The 1.0 API Media Device specification enables interoperability between disparate video products, expanding opportunities for companies that provide solutions to the physical security marketplace. The 1.0 specification is available free of charge and can be viewed at www.psialliance.org.
