

## United Kingdom Public Space References

### **Mansfield CCTV**

Mansfield CCTV system consists of a hybrid Synectics solution merging analogue and IP based video, full frame rate D1 resolution recording of 200+ video channels, 4 Synergy Pro operator positions. Systems integration is provided for wireless 3G based cameras, ADSL based remote DVR's, help point, PA and ANPR systems

**Cath Bannister +44 (0) 1623 463085**

### **Wakefield CCTV**

Wakefield CCTV system consists of a hybrid Synectics solution merging analogue and IP based video, full frame rate D1 resolution recording of 200+ video channels, 8 Synergy Pro operator positions. Systems integration is provided for a fully integrated audio system (telephony, help points, PA and police radio systems) remote Dedicated Micro's DVR's, large screen display wall control (15 \* 42inch LCD's) and ANPR

**Darren Pollington +44 (0) 1977 727674**

### **Manchester CCTV**

Manchester CCTV was one of the first fully integrated CCTV control rooms in the UK and was initially deployed in 2000 using analogue switching technology and low frame rate, CIF resolution recording of 400+ video channels, 6 Synergy Pro operator positions. Systems integration was originally provided to help points within Manchester's car parks along with ANPR. More recently a further 100+ channels have been added to the system using Synectics ground breaking H.264 video servers all recorded at full frame rate D1 resolution. Further integration has also been provided to remote site DVR systems along with the addition of the Synergy traffic enforcement module that enables bus lane, parking and other traffic contraventions to be enforced and penalty charge notifications produced.

### **Sheffield CCTV**

Sheffield CCTV was initially deployed in 2000 using analogue switching technology and full frame rate, D1 resolution recording of 200+ video channels, 4 Synergy Pro operator positions. Systems integration was originally provided to help points and ANPR. Over subsequent years further Synectics solutions have been deployed around Sheffield including the Meadowhall shopping mall, and Sheffield University campuses increasing the overall camera count significantly and creating a multi control room environment with each subsystem able to operate in either a stand alone or full shared camera access mode. Most recently the addition of the Synergy traffic enforcement module enables bus lane, parking and other traffic contraventions to be enforced and penalty charge notifications produced.
