"We have been very pleased with how user-friendly and reliable the Synectics' system is and have found this system to be easy to maintain"

Lois Coyle-Duffy, Director of Surveillance
Indiana Live! Casino

About Synectic Systems, Inc.

Synectic Systems, Inc. (Synectics), a wholly owned subsidiary of UK-based Quadnetics Group Plc, is an engineering, integration and manufacturing company with expertise in IT and networked systems, CCTV control systems, enterprise DVR and command control software applications. Quadnetics is listed on the Alternative Investment Market (AIM) of the London Stock Exchange.

Synectics' unparalleled ability to deploy custom digital surveillance solutions that integrate with existing legacy systems and future technologies has established them as a market leader in the Middle East, the UK, Europe and North America.

Vegas-Style Indiana Live! Casino Selects Surveillance Solution From Synectics

June 2008 – Synectic Systems, Inc. (Synectics), global provider of enterprise-class digital video recording, and award-winning command and control software products, has been selected by Indiana Live! Casino in Shelbyville, Indiana to create a custom surveillance solution for its temporary and brand new 233,000 square-foot facility opening in January 2009 adjacent to Indiana Downs racetrack.

The new facility will not only feature slots and electronic gaming devices, but also upscale dining and nightlife destinations, and a 5,000-seat outdoor concert venue. The closest casino to Indianapolis, Indiana Live! opened its 70,000 square-foot temporary location in June 2008. This facility features more than 1,900 slot machines that are monitored by over 300 cameras with Synectics' digital recording system and Synergy™, its industry-leading integration, command and control software. Once the new facility is opened in 2009, there will be approximately 500 channels of high quality digital recording monitoring the casino.

Digital video integration to a Pelco matrix switch, point of sale and access control systems will provide sophisticated monitoring and data analysis capabilities within Synergy. The new system will enable Indiana Live! surveillance operators to access live and recorded H.264 digital video instantaneously with multiple layers of system fail over and 24/7 reliability. With its comprehensive, scalable and centralized security management system, Synectics has earned gaming industry recognition for surveillance solutions that meet and exceed the demands of the tightly regulated casino environment.

Lois Coyle-Duffy, Director of Surveillance at Indiana Live! Casino states, "Having a somewhat unique situation at Indiana Live! Casino, we installed a 480 channel Synectics system with a Pelco Matrix in our temporary facility and recently placed an order to expand that system to at least 640 channels for the permanent facility which will be opening in 2009. We will also be taking our point of sale integration from 12 stations to 48 stations and have an integration scheduled with a DSX alarm / access control system. We have been very pleased with how user-friendly and reliable the Synectics' system is and have found this system to be easy to maintain. Synectics was one of three systems considered and we are pleased that it was the system selected."
